EDUCATION

ABES Engineering College

Ghaziabad, India

Bachelor of Technology in Computer Science and Engineering; CGPA: 7.7

July 2027

- Relevant Coursework: Data Structures & Algorithms, Operating Systems, Computer Networks, Software Engineering, Database Management Systems, Object-Oriented Programming, Distributed Systems, System Design Fundamentals

TECHNICAL SKILLS

Languages: Python, C++, JavaScript, Java, SQL

Frameworks: Spring Boot, React.js, Express.js, Thymeleaf, Bootstrap

Databases: MongoDB, MySQL, PostgreSQL

Developer Tools: Docker, Git, Linux, Postman, JWT, REST APIs, CI/CD, HTML/CSS

ML/AI: OpenCV, Tesseract OCR, Python (NumPy, Pandas), BERT, KeyBERT, Sentence Transformers

EXPERIENCE

Core Member

August 2024 – 2025

Enigma Programming Club, ABES Engineering College

Ghaziabad, India

- Helped organize competitive programming workshops and coding contests, supporting participants during problem-solving sessions
- Worked with peers to explain DSA concepts and solve algorithmic problems on platforms like LeetCode and Codeforces

PROJECTS

ByteCrush - File Compression Toolkit | C++, STL, Multithreading | [GitHub](#)

- Engineered multi-threaded file compressor implementing Huffman, LZW, and RLE algorithms, reducing file sizes by 50-60% on multi-GB text files
- Achieved 2.5x throughput improvement vs single-threaded baseline through thread pooling and optimized I/O operations

AlgoVerse - Advanced DSA Platform | React.js, Tailwind CSS, Node.js, C++ | [GitHub](#)

- Built platform delivering clear, structured explanations of advanced DSA topics (DP, Graphs) with 50+ curated competitive programming problem solutions
- Designed responsive, component-based pages using React & Tailwind for fast rendering and consistent user experience

ChargeShare - P2P EV Charging Platform | React, Node.js, MongoDB, Google Maps API | [GitHub](#)

- Built marketplace for EV owners to list, find, and book private chargers with real-time geolocation search functionality
- Optimized map queries to reduce latency by 40% and sustained 1,000+ concurrent requests in load testing scenarios

Smart Tourist Safety System | AI, Blockchain, Geofencing, Flutter, MongoDB | [GitHub](#)

- Developed AI and Blockchain-based system for digital tourist IDs, route-risk prediction, and real-time SOS alerts with tamper-proof logging
- Created dashboards for law enforcement and tourism authorities to track incident clusters and high-risk zones with automated E-FIR generation

AWARDS & ACHIEVEMENTS

Tata Imagination Challenge (2024): Top 2.27% among 312,000+ participants; National Semi-Finalist

Paranox 2.0 - Rishihood University (2025): Top 40 Finalist among 20,000+ participants and 1,500+ teams

Ardethon Hackathon - ABESec (2025): 3rd place for AI-based solution among 100+ competing teams

Google Cloud Arcade: Achieved Legend status through hands-on labs in GCP, BigQuery, Kubernetes, AI/ML, Cloud Functions

LeetCode: 1519 rating; solved 450+ Data Structures & Algorithms problems

CodeChef: 1616 rating; Global Rank 74 (Starters 211), Rank 350 (Starters 173)

Naukri Campus Young Turks (2025): AIR 1391 (AI Track) & 3019 (Aptitude) among 500,000+ participants

Certifications: Oracle Cloud Infrastructure - Generative AI Professional (2025), Tata GenAI Data Analytics (2025), Linux Unhatched - Cisco Networking Academy (2025)
